CLADS & NATURAL STONES

DISCLAIMER

Natural stone are quarried material and are products of nature

1. All natural stone colours are species of natural materials; coloration; veining, and texture (i.e. pits, fissures, and fragmentation) will vary from samples and may be a part of finished product.
2. Thickness of natural stone may vary from product to product, even within the same species of stone

3. Some material are porous in nature and while it is highly resistant to staining and scratching, it can be subject to both. We make no warranties implied or expressed as to stain resistance or imperviousness of the product to scratching.

4. Due to limitation in photography and on-screen reproduction actual products and photographs may differ

Photographs and samples are only intended to represent the general characteristics of color and texture of the natural product. Like no two human beings are identical, no two pieces of natural stone are identical and matching but when you choose a particular type of stone, all pieces came from the same family, and they have same characteristics with similar looks, not the same looks.
